

Stainless steel honeycomb panel

Renoxbell **stainless steel honeycomb panel** is a sandwich panel consisting of stainless steel plates as face panels, and high pressure low density PE as core materials. It is of corrosion resistant, free of painting, good mechanical property.

Good points of stainless steel honeycomb panel

1. Super strength, good bending resistant and relatively light weight
2. Good corrosion resistant
3. Free of painting and with stainless steel texture
4. Stainless steel saving and cost effective

Dimensions of Stainless steel honeycomb panel

1. Thickness:4mm.....600mm
2. Width: 50mm.....1500mm
3. Length:100mm.....5000mm
